Certified cable management – from rolling stock to infrastructure
Your partner with over 80 years’ experience in cable management solutions for the rail industry

There is hardly any other industrial sector that puts such high demands on components and solutions as modern rail vehicle construction. The highest quality, maximum service life and compliance with the strictest safety criteria are absolute requirements. More than 75,000 products, many years of industry know-how and a high degree of development competence make HellermannTyton one of the leading companies for sophisticated solutions in bundling, fastening, identifying, protecting and processing cables and wires in rail vehicle construction.

We’re at home in 38 countries and speak your language.
Global expertise: Find your local contact here

If you have any questions on specific solutions or would just like to receive more information, we are happy to help – with all our experience and with technical know-how.

Reliability and safety in rail vehicles

The classification system defined in EN 45545-2 specifies requirements for the fire behaviour of materials and products used in rolling stock.

The thresholds for oxygen index, smoke density and toxicity are outlined in the requirement sets R22, R23 and R24. HL3 – the most stringent of three Hazard Levels – indicates where material behaviour gives rail passengers the greatest chance of orientating themselves and not suffocating from toxic fumes in the event of fire.

To meet HL3, the oxygen index of a tested material must be above 32 percent, smoke density 300DS or lower and toxicity index of smoke below 0.75 CIT NLP.

Our tailor-made cable tie solutions for the special needs of the railway industry – certified according to EN 45545-2 and International Railway Industry Standard (IRIS)

In the rail industry, stringent safety legislation is decisive in terms of marketability. International certification is key in this regard. The IRIS (International Railway Industry Standard) is already firmly enshrined in HellermannTyton’s procurement guidelines. As a long-standing manufacturer for the rail industry, we meet all requirements in this area and tailor our services to the needs of railway suppliers. In particular, the harmonious interplay between project management, configuration management and obsolescence management boosts the safety and efficiency of your operations.

As one of the world’s leading manufacturers of products for fastening, fixing, installing, connecting, insulating, protecting and identifying electrical cables and data network infrastructure, HellermannTyton offers a wide range of fixing solutions for the railway business. Not only do we offer different raw materials. We also offer different designs that serve the special needs of the railway market.

Available products and designs:

- T-Series cable ties available in a wide range of sizes made of Polyamide 6.6 weather resistant and Polyamide 6.6 V0 (PA66W+PA66V0)
- KR-Series cable ties with its unique locking system. Very secure and vibration resistant fixing solution made of Polyamide 6.6 and Polyamide 6.6 weather resistant (PA66 NA+PA66W)
- OS-Series cable ties with smooth surface to the bundle made of Polyamide 6.6 weather resistant (PA66W) and Polyamide V0 (PA66V0) for low smoke emission or limited fire hazard
- Other series and materials like PA46, PA66HS, Tefzel® and PEEK and others available upon request
Are you looking for the right solution? We have it – quickly, easily and individually. Our product range.

**Intensive analyses of the market and the competition** make it possible for us to recognise processing and market trends at an early stage. The current result: more than 75000 items you can choose from today. As an IRIS development partner, HellermannTyton also offers you bespoke solutions specifically for your needs in rail vehicle construction. Our team of experts is happy to help out at any time.

**Customer-specific product development**

HellermannTyton is on the spot whenever new solutions are required. We develop products tailored to your specifications. To do this we rely on state-of-the-art CAD and rapid prototyping systems. Through the use of advanced development tools, our experienced designers guarantee a high level of quality in all our products.

The result: innovative solutions and the chance for you to benefit from these advantages.

- Save development time
- Reduce weight
- Reduce component diversity
- Choose the right material
Our products for rolling stock

We have a solution for all parts of rail vehicles. The toughest requirements are on the bogeys, on the roof and underbody. Vibration resistance is key. We conduct vibration tests on our products to make sure that they conform to the requirements (CEI 61373(1999 cat 2).

We have been supplying products to the railway sector since the 1950’s. We have a long experience in fastening, protecting and identify cables with plastic or metal solutions.

We are conscious of the high standards that the railway industry needs to achieve. With a strong emphasis on quality, we can help you find the product or service need.

HellermannTyton has been serving leading rolling stock players for a long time. Our close relationship enable us to work together easily on specific challenges and we regularly develop innovative product solutions.

It is in our genes to create customised solutions for our customers. We adapt to your needs.

Cable Ties for outdoor use (UV-resistant)

T-Series in PA66W black

These inside serrated cable ties are made of UV resistant Polyamide 6.6 (PA66W) and thus suitable for outdoor applications. UV stabilised cable ties resist UV radiation for a considerably longer period compared to standard PA66 cable ties. They can easily be used for bundling and securing cables, pipes and hoses especially in outdoor areas.

Features and benefits
- UV resistant black cable tie available in a wide range of sizes
- Made from 100 % high quality plastic, allows for good recycling
- Inside serration for a strong hold onto bundles
- Easy application either manually or with a processing tool
- Simply to insert due to bent tail

Cable Ties for higher fire-protection
T-Series in PA66V0 white

T-Series cable ties for bundling and securing cables, pipes and hoses. These cable ties can be used for almost any type of application especially where safety regulations are high and the reduction of smoke and dangerous gases is required. PA66V0 products are most critically used within public sector areas – particularly in the rail, construction and defence industry.

Features and benefits
• White cable tie for higher fire-protection
• Conform to low smoke generation requirements (UL94 V0)
• Low evolution of toxic gases and corrosive acids in event of a fire
• PA66V0 cable ties are available in different sizes
• High safety rating due to low fire hazard

White T-Series cable ties for higher fire protection (PA66V0).

Cable Ties for thin-walled bundles

OS-Series

OS-Series cable ties are used in many areas where thin-walled or soft insulation wires and cable are being installed. Despite the railway industry these cable ties are used in the automotive and aircraft industry. OS ties made from material PA66V0 are suitable for applications where safety regulations, e.g. reduction of smoke and dangerous gases, are required.

Features and benefits
- Outside serrated cable tie with smooth surface to the bundle
- Tie follows the contours of the cable bundle perfectly
- Takes up less space due to curved head
- Easy insertion and high tensile strength
- For limited fire hazard demand: Material PA66V0
- Easy application either manually or with a processing tool

Cable Ties for thin-walled bundles

OS-Series cable ties are used in many areas where thin-walled or soft insulation wires and cable are being installed. Despite the railway industry these cable ties are used in the automotive and aircraft industry. OS ties made from material PA66W are suitable for indoor and outdoor applications.

Features and benefits
- Outside serrated cable tie with smooth surface to the bundle
- Tie follows the contours of the cable bundle perfectly
- Takes up less space due to curved head design
- Easy insertion combined with high tensile strength
- PA66W material is perfectly suited for outdoor applications
- Easy application either manually or with a processing tool

Material
- Polyamide 6.6, UV-resistant (PA66W)
- Operating Temperature: -40 °C to +85 °C
- Flammability: UL 94 V2
- EN 45545-2 Classification: R22 HL2, R23 HL2

The curved head design of the OS-Series

**Cable Tie locked by glass fibre pin**

**KR-Series**

This cable tie is distinguished by its smooth strap and unique locking mechanism. The chamfered head of the KR-Series allows for a firm fit around the bundled element. Due to its special design KR-Series cable ties can be used as a safety method to bundle any cable and to also secure bellows on steering racks, water hoses or vacuum lines. The endless strap version is fairly flexible and can be cut to any length required. Separate heads are available to fix the strap.

**Features and benefits**
- Unique cable tie system
- Cable tie without serration to avoid any damage to cables
- Strap is locked into place with a glass-fibre reinforced pin
- Very secure and vibration resistant fixing
- KR-ties up to 426 mm are made as one piece
- For assembly a special KR-tool is needed

2-Piece Fixing Ties with Fir Tree, with Disc, for Round Holes

Primarily designed for fixing cable harnesses in the automotive industry, their simplicity, and ease of use, has seen these parts used in everything from aircraft, to switch-gear, to washing machines.

Features and benefits
- Pre-assembled 2-piece fixing tie with fir tree foot part
- Cable tie head can be moved after bundling
- Easy to assemble without the need for a tool
- Disc adjusts tie for pressure from various directions and minimises access of dust, dirt and water
- Fir tree foot part can be used for a variety of panel thicknesses
- Suitable for use within threaded holes

**Cable Ties and Fixings**

**Cable Ties With Fixing Elements**

---

**2-Piece Fixing Ties with EdgeClip**

**EdgeClip 1-3 mm**

Many applications require cables to be run parallel to each other but separated to avoid abrasion. These cable ties and EdgeClip assemblies are ideal for use where holes are not acceptable or where due to temperature problems adhesives will fail.

**Features and benefits**

- For parallel routing of cables, hoses or harnesses
- Easy assembly, just clip on per hand
- For edges of 1-3 mm
- Integrated metal clamp holds clip firmly in place
- Clamp consists of double tempered steel spring
- Ideal for applications where holes or adhesives are not suitable

2-Piece Fixing Ties for Heavy Duty Applications, for Screws

These cable ties and heavy duty mounts (HDM) are used where a robust, secure and durable bundling is requested and eliminates the needs for multiple sized fix diameter clamps.

Features and benefits
- Cable tie head can be moved after bundling
- Secure alignment to the bundle due to H-design
- Withstands vibrations and displacement forces
- High tightening torque through metal bushing

Ratchet P-Clamp
For bundle diameters from 6.2 mm up to 51.0 mm

The Ratchet P-Clamp family offers versatility when managing wires, cables and hoses. The robust design and durable materials make it ideal for heavy duty applications, both in- and outdoors. The one-piece adjustable clamp can be closed by hand to the desired diameter. The release feature provides easy and nondestructive removal of cables simply by using a flat-head screwdriver. This nondestructive release allows the clamp to be reused without removing or replacing any bolts or screws. The Ratchet P-Clamp is offered in four sizes and multiple mounting configurations.

Features and benefits
- One-piece ratchet closure design allows for easy installation during pre- or final assembly
- Multiple configurations handle a wide range of diameters and applications, reducing part inventory
- Clamp interior is designed to guide and center bundle to reduce pinching
- Easy release feature allows for quick adjustments and maintenance
- Impact modified, heat and UV stabilized PA66 provides long-term durability, in- and outdoors
- Steel mounting plate tolerates high torque mounting and is treated to resist chemicals and salt spray

Paste Adhesive Mount

PMB·Series

PMB3 paste mount offers a fixing solution wherever screw fixing is not allowed. Due to the design the mount can even be installed onto uneven surfaces. PMB3 paste mount is used in the railway industry as well as in the renewable energy industry. Further applications are in the electrical industry and the production of switching cabinets. The PMB3 paste adhesive mount is suitable for fixings with paste/liquid adhesive.

Features and benefits
- PMB3 paste adhesive mount for fixings with paste / liquid adhesive
- Mount geometry offers a good form closure with cured adhesive
- Can even be installed onto uneven surfaces
- Designed for use in confined spaces
- Made of flame-retardant material PA666V0
- Cost efficiency through reduced use of paste adhesive

Plastic P-Clamps

For permanent or semi-permanent cable fixings this range of plastic P-Clamps can be used in many industries. Their light weight makes them particularly suitable for use in areas such as aircraft and aerospace where minimising weight, but retaining a strong fixing, is vitally important.

Features and benefits
• Manufactured from Polyamide
• Good temperature resistance and high strength
• Wide range of sizes for every application
• Can be used without cable ties

**Rivet Mount**

**TY5-Series**

The TY Fixings are ideal for use where a high pull out force is required (eg. in the aircraft industry). The two piece ‘wedge’ ensures that once installed the mounts will not come away from the panel. Particularly designed for areas with restricted access.

**Features and benefits**
- Quick installation
- Two-piece wedge
- Easy insertion
- Firmly fixes wide variety of cable ties

Heat shrinkable tubing 2:1 – Flame retardant TR27

TR27 is used in applications where toxic emissions evolved in a fire must be minimised, e.g. for heavily populated buildings or safety sensitive areas like tunnels, hospitals, schools, theatres, mass transit vehicles and computer centres.

Features and benefits
- Thin wall, flexible polyolefin tubing
- Optional available with adhesive or as thick wall version (SR27)
- Halogen free and excellent flame-retardant properties
- Meets various industrial standards

TR27 is ideal for safety sensitive areas.

MATERIAL
- Polyolefin, cross-linked (PO-X)
- Shrink Ratio 2:1
- Operating Temperature -40 °C to +105 °C
- Min. Shrink Temperature +115 °C
- Longitudinal change after shrinkage +5 %/-10 % max.
- Dielectric Strength 15 kV/mm according to IEC 684 P2
- EN 45545-2 Classification R22 HL3, R23 HL3
- Flammability Limited Fire Hazard, halogen free, low generation of toxic gases and corrosive acid, low smoke generation

All dimensions in mm. Subject to technical changes.
Minimum Order Quantity (MOQ) may differ from package content.

Heat shrinkable tubing 3:1 – Flame retardant

TA37 – thin wall adhesive lined

TA37 shrink tubing has a low smoke index and excellent flame retardant properties to meet strict fire security standards in electrical insulation.

Features and benefits
- Thin wall adhesive lined heat shrink tubing
- Halogen free
- Flame retardant
- Combination of these three (halogen free, adhesive lined and flame retardant) product properties is unique

MATERIAL
- Polyolefin, cross-linked (PO-X)

Operating Ratio
- 3:1

Operating Temperature
- -40 °C to +105 °C

Min. Shrink Temperature
- +150 °C

Softening Point Adhesive
- +85 °C

Longitudinal change after shrinkage
- -15 % max.

EN 45545-2 Classification
- R22 HL3, R23 HL3

Flammability
- self-extinguishing

Heat Shrinkable Tubing 3:1 with adhesive

Heat shrinkable tubing up to 4:1, self-extinguishing, halogen-free – 1 m lengths

**HR47 – thick-walled**

The thick-walled heat shrinkable tubing HR47 is halogen-free, self-extinguishing and has a low smoke index. Therefore the product is extremely suitable for mechanical protection (e.g. anti-kink and abrasion protection) in public transportation applications such as trains, busses, planes, tunnels and elevators.

**Features and benefits**
- Thick-walled, rigid polyolefin heat shrinkable tubing
- Halogen-free
- Self-extinguishing
- Low smoke index
- DIN EN 45545-2 (HL3) approved
- High shrink ratio up to 4:1

**MATERIAL**
- Polyolefin, cross-linked (PO-X)

**Shrink Ratio**
- up to 4:1

**Operating Temperature**
- -55 °C to +110 °C

**Min. Shrink Temperature**
- +120 °C

**Longitudinal Change After Shrinkage**
- 10 % max.

**Dielectric Strength**
- 15 kV/mm

**Flammability**
- self-extinguishing

**EN 45545-2 Classification**
- R22 HL3, R23 HL3

---

**Features**
- Thick-walled, rigid polyolefin heat shrinkable tubing
- Halogen-free
- Self-extinguishing
- Low smoke index
- DIN EN 45545-2 (HL3) approved
- High shrink ratio up to 4:1

**Benefits**
- Low smoke and toxic gas emissions.

**EN 45545-2**

Please note! Not all products listed on this page may have this approval. Please check our website for latest approvals.

Heat shrinkable tubing 2:1 – self-extinguishing, halogen-free and diesel resistant

TU28 - thin-walled

The thin-walled heat-shrinkable tubing TU28 is halogen-free, self-extinguishing, has a low smoke index and therefore is extremely suitable for installation in public transportation applications such as trains, busses, planes, tunnels and elevators.

Features and benefits

- Thin-walled, flexible polyolefin heat shrinkable tubing
- Halogen-free
- Self-extinguishing
- Low smoke index
- DIN EN 45545-2 (HL3) approved
- Diesel resistant

More colours on request. Please contact us.

TU28 meets highest safety standards.

High-expansion polyester braided sleeving
Helagaine HEGPX

Helagaine HEGPX is used wherever a higher expansion rate is required. It is particularly suitable for use in the rail, automotive and machine building industries.

Features and benefits
- Made of sturdy polyester
- Highly flexible
- Expands to 3x nominal diameter
- Easy to apply over irregular shapes
- Good abrasion resistance

Flame-retardant polyester braided sleeving
Helagaine HEGPETFR

HEGPETFR has excellent flame-retardant properties. It is particularly recommended for applications for instance in public transport, aircraft and telecommunications.

Features and benefits
- Made of sturdy polyester
- Self-extinguishing according to UL94 V0 for enhanced fire protection
- Highly flexible
- Easy to apply over irregular shapes
- Good abrasion resistance

# Abrasion-resistant polyamide braided sleeving

**Helagaine HEGPA66**

Helagaine HEGPA66 offers especially high abrasion resistance and surface coverage.

**Features and benefits**
- Made from heavy-duty polyamide yarn
- Excellent abrasion resistance
- Highly flexible
- Easy to apply over irregular shapes
- Eases application by expanding when compressed
- Very high surface covering

**MATERIAL**
- Polyamide 6.6 (PA66)
- Operating Temperature: -60 °C to +150 °C, intermittent +200 °C
- Melting Point: +255 °C
- Flammability: UL 94 V2, FMVSS 302
- EN 45545-2 Classification: R22 HL3, R23 HL3

Self-closing, flame-retardent polyester sleeving

Helagaine Twist-In-FRX

Helagaine Twist-In-FRX is used wherever fire protection is essential, such as in the railway, aerospace and shipbuilding industries.

Features and benefits
- Self-closing sleeve made from polyester
- Optimal fire protection
- Easy and quick installation and removal
- Ideal for retro-fitting
- Allows access to bundle for assembly, inspection and maintenance

MATERIAL
Polyester (PET)

EN 45545-2 Classification
R22 HL3, R23 HL3

Helagaine Twist-In-FRX is used wherever fire safety is important.
Helawrap Cable Cover

Helawrap HWPAV0 is easily and rapidly applied over pre-mounted cables. It has excellent flame-retardant properties and is halogen-free.

Features and benefits

- Ideal solution for bundling, protecting and fixing cables
- Quick and effortless to apply
- Self-extinguishing according to UL94 V0
- Very good abrasion protection
- Special profile enables branching off cable at any point
- Can be removed and reapplied often
- Handy applicator tool included

MATERIAL

Polyamide 6 V0 (PA6V0)

Operating Temperature

-40 °C to +90 °C, intermittent +120 °C

Flammability

UL 94 V0

EN 45545-2 Classification

R22 HL2, R23 HL2

All dimensions in mm. Subject to technical changes.

Minimum Order Quantity (MOQ) may differ from package content.

Application video:
Helawrap

Cables can be branched off at any point for better, more flexible protection.

Insert one or more cables into the insertion slot of the HAT applicator tool.

Place the HAT applicator tool in one end of the Helawrap cable cover.

Simply slide the HAT applicator tool through the Helawrap cover.

Flame-retardant polyamide spiral binding
SBPAV0

Due to its excellent flame protection properties, SBPAV0 spiral binding is particularly suitable for the rail and aviation industries as well as public buildings.

Features and benefits
- Organises and protects cables and hoses
- Self-extinguishing according to UL94 V0
- Very good protection against abrasion
- Suitable for retro-fitting
- Cables branch out at any point
- Wide range of diameters

Halogen-free wiring ducts

HelaDuct HTWD-HF

HelaDuct HTWD-HF wiring ducts are used to route and protect wires in control panels and switching systems where there are high demands on personal or material safety in case of fire, such as in public transport, tunnels, data-processing centers or public buildings.

Features and benefits

- Excellent fire-safety characteristics
- Narrow slots suitable for small-diameter wires
- Smooth, burr-free edges protect installers from injury and wires from damage
- Fingers can be removed with no sharp edges at pre-notched snap-off points
- Further pre-notched snap-off point at base of sidewall allow cutting out and removing sections of sidewall with no sharp edges
- Duct covers hold securely even in a vertical position and under vibration
- Cover is flush with side of duct, allowing for tight, contiguous placement of duct
- Base perforation according to DIN EN 50085

The HelaDuct HTWD-HF halogen-free wiring ducts meet the highest requirements of fire safety.

MATERIAL

Acrylonitrile Butadiene Styrene alloyed with Polycarbonate (PC/ABS)

Colour

Halogen-free wiring ducts
HelaDuct HTWD-HF (DIN sizes)

HellermannTyton HTWD-HF halogen-free ducts are used wherever there are high demands on personal or material safety, such as public transport, tunnels, lifts and data processing centres.

Note: Halogen-free PC+ABS is not resistant to all oils and greases.

Features and benefits
- Excellent fire-safety characteristics
- Narrow slots suitable for small-diameter wires
- Smooth, burr-free edges protect installers from injury and wires from damage
- Fingers can be removed with no sharp edges at pre-notched snap-off points
- Further pre-notched snap-off point at base of sidewall allow cutting out and removing sections of sidewall with no sharp edges
- Duct covers hold securely even in a vertical position and under vibration
- Cover is flush with side of duct, allowing for tight, contiguous placement of duct
- Base perforation according to DIN EN 50085

The HelaDuct HTWD-HF halogen-free wiring ducts meet the highest requirements of fire safety.

Shrinkable markers „Continuous Tube“, thermal transfer

TLFX – 2:1 Rail Limited Fire Hazard

TLFX is a halogen free European rail approved 2:1 heat shrink marker material supplied as a continuous tube and printable on both sides. Special material properties show low smoke propagation, density and toxicity. The tubing has been especially prepared so that print performance is excellent at all times. HellermannTyton’s printer range allow users to create a high quality print. In addition it is possible to either perforate the tubing at pre-determined lengths or fully sever the markers.

Features and benefits
- Shrink ratio 2:1
- Halogen Free
- Low smoke propagation, density and toxicity
- High Oxygen Index value (36.5 %)
- Available in yellow or white
- Cable range 50.8 mm to 1.2 mm
- Delivery in convenient storage boxes

### TLFX- high performance halogen free heat shrink tube.

Shrinkable markers „Ladder Style”, thermal transfer

TLFX DS – 2:1 Rail Limited Fire Hazard „Ladder Style”

TLFX DS is a halogen-free European rail approved 2:1 heat shrink marker material supplied pre-cut and formatted into a convenient „ladder” system. Special material properties show low smoke propagation, density and toxicity. This pre-cut format not only allows printing on both sides of the marker but the user can also easily choose and pick each required marker. Special material properties show low smoke propagation, density and toxicity. The tubing has been especially prepared so that the print performance is excellent at all times using HellermannTyton’s printer range.

Features and benefits
• Shrink ratio 2:1
• Halogen Free
• Low smoke propagation, density and toxicity
• High Oxygen Index value (35.4%)
• 50 mm, 25 mm and 16 mm pre-cut marker options as standard, other lengths available on request
• Available in yellow or white
• Cable range 38.1 mm to 1.2 mm
• Delivery in convenient storage boxes

MATERIAL
Polyolefin, cross-linked (PO-X)

Operating Temperature
-55 °C to +105 °C

Min. Shrink Temperature
+100 °C

Shrink Ratio
2:1

Recommended Ribbon Type
TDDTHOUT

Thermal Transfer Printer
TT430, TT4030, TrakMark DS

EN 45545-2 Classification
R22 HL3, R23 HL3
Shrinkable markers „Continuous Tube“, thermal transfer

**TDRT - 2:1 Rail Diesel Resistant**

TDRT is a diesel resistant 2:1 heat shrink material which is rail approved. It is supplied as a continuous tube and printable on both sides.

The TDRT material is ideal where resistance to diesel, organic fluids, common fuels, lubricants and solvents properties are required, e.g. in mass transit, aerospace, marine and industrial installations. The tubing has been especially prepared so that the print performance is excellent at all times using HellermannTyton’s printer range. In addition it is possible to either perforate the tubing at pre-determined lengths or fully sever the markers.

The material is also especially formulated to be printable with laser beam printers.

**Features and benefits**

- Shrink ratio 2:1
- Resistant to diesel and common fluids
- Available in yellow as standard and white on request
- Delivery in convenient storage boxes

Shrinkable markers „Ladder Style“, thermal transfer

TDRT DS - 2:1 Rail Diesel Resistant „Ladder Style“

TDRT DS is a diesel resistant 2:1 heat shrink material which is rail approved. The material is pre-cut and formatted into a convenient „ladder“ system that allows printing on both sides of the marker.

The TDRT DS material is ideal where resistance to diesel, organic fluids, common fuels, lubricants and solvents properties are required, e.g. in mass transit, aerospace, marine and industrial installations. This pre-cut format not only allows printing on both sides of the marker but the user can also easily choose and pick each required marker. The tubing has been especially prepared so that the print performance is excellent at all times using HellermannTyton’s printer range.

The material is also especially formulated to be printable with laser beam printers.

Features and benefits
• Shrink ratio 2:1
• Resistant to diesel and common fluids
• 50 mm and 25 mm lengths are standard, other lengths available on request
• Available in yellow as standard and white on request
• Delivery in convenient storage boxes

Shrinkable markers „Ladder Style“, thermal transfer

TLFD DS – 2:1 Rail Limited Fire Hazard, fluid resistant „Ladder Style“

TLFD DS is an innovative 2:1 heat shrink marker which is halogen free, low fire hazard and fluid resistant. This rail and EN approved material is supplied pre-cut and formatted into a convenient „ladder“ system.

The TLFD DS marker’s material properties are ideal for applications where fire protection is of great importance. TLFD DS shows low smoke propagation, density and toxicity and is also ideal for applications where resistance to organic fluids, common fuels, lubricants and solvents properties are required.

The pre-cut format not only allows printing on both sides of the marker but the user can also easily choose and pick each required marker. The tubing has been especially prepared so that the print performance is excellent at all times using HellermannTyton’s printer range.

Features and benefits
- Shrink ratio 2:1
- Halogen free and fluid resistant
- Low smoke propagation and toxicity
- Fluid resistant
- „Ladder Style“ format for ease of use
- Available in yellow and white
- 50 mm and 25 mm pre-cut markers as standard

TLFD DS shrinkable markers for more safety and clarity in the switchboard.

TLFD DS „ladder style“ markers for demanding applications.

Identification tags for cable bundle, thermal transfer

**TIPTAG HF – Rail Limited Fire Hazard, Halogen free**

The Tiptag HF cable markers have been designed to identify larger wires and cable bundles not only in the electronics and general cabling environments but also in the railway industry. Tiptag HF is halogen free and its material properties show low smoke propagation, density and toxicity. Tiptags are presented in a special perforated format which include fastening slots for easy fitting with cable ties. They are also suitable for retrofit purposes.

Print from the reel with HellermannTyton’s premium range of thermal transfer printers and ribbons for optimum print quality and longevity.

**Features and benefits**
- Ideal for marking larger wire and cable bundles
- Halogen free
- Low smoke propagation and toxicity
- Perforated format that includes fastening slots for cable ties
- Available in various colours

**MATERIAL**

| Polyolefin (PO) |

**Operating Temperature**

-40 °C to +90 °C

**Flammability**

Limited Fire Hazard, low generation of toxic gases and corrosive acid, low smoke generation, halogen free

**Recommended Ribbon Type**

TDTHOUT

**Thermal Transfer Printer**

TT430, TT4030

**EN 45545-2 Classification**

R22 HL3, R23 HL3

Identification tags for cable bundle „Ladder Style“, thermal transfer
TAGLF – Rail - Limited Fire Hazard Tiptags

TAGLF is a halogen free cable marker for mass transit applications specifically in the railway industry or for all areas where limited fire hazard material is needed. TAGLF’s material properties show low smoke propagation, density and toxicity. They are supplied pre-cut and have been formatted into a convenient „ladder“ system. Simply print and press out the required TAGLF and apply with cable ties, they are also suitable for retrofit purposes.

Print with HellermannTyton’s premium range of thermal printers and ribbons or a laser beam marking device.

Features and benefits
- Limited fire hazard cable marker
- Halogen free
- For larger cables and wires, bundles
- Thermal transfer or laser beam printable
- Good mechanical strength and highly flexible
- Delivered on reel in convenient storage boxes

MATERIAL
Polyolefin, cross-linked (PO-X)

Operating Temperature
-40 °C to +105 °C

Flammability
Self-extinguishing

Recommended Ribbon Type
TTDTHOUT

Thermal Transfer Printer
TT430, TT4030

Oxygen Index
34.4 %

Identification tags for cable bundle „Ladder Style“, thermal transfer

TAGDR – Rail - Diesel Resistant Tiptags

TAGDR is a cable marker designed for environments where identification is exposed to organic fluids and oils for long periods at high temperatures. The diesel resistant marker is ideal for rail applications. They are supplied pre-cut and have been formatted into a convenient „ladder“ system. Simply print and press out the required TAGDR and apply to cables and harness assemblies with cable ties, they are also suitable for retrofit purposes.

Print with HellermannTyton’s premium range of thermal printers and ribbons or a laser beam marking device.

Features and benefits
- Fluid resistant cable marker
- For larger cables and wires, bundles
- Thermal transfer or laser beam printable
- Good mechanical strength and highly flexible
- Delivered on reel in convenient storage boxes

Thermal transfer printer
TrakMark DS, Double Sided

The TrakMark DS is a high-performance printer for double-sided printing. This printer is perfect for double-sided printing on HellermannTyton shrinkable tubing. With two print heads mounted one on top of the other, the TrakMark DS prints onto both sides of the material at the same time. High reliability and multiple peripherals enable applications and solutions tailored to specific customer requirements. It is easy to use thanks to its display and clear status messages which can be shown in multiple languages. 300 dpi resolution ensures that barcodes, warning symbols, logos and text are as sharp as they can be.

Features and benefits
• High volume double sided printing
• Prints perfectly on HellermannTyton heat shrink ladder style products
• Uses standard 300 m ribbons
• Barcodes: standard and 2D
• Print speed up to 125 mm/s (30 mm/s recommended for ladder style products and tubing)
• Multiple language selection
• Windows drivers: 32/64 bit for Windows XP, Windows Vista, Windows 7, 8, 10

Print Method | Thermal transfer
Print Head Type | 300 dpi, flat type
Print Speed | 30, 40, 50, 75, 100, 125 mm/s
Max. Print Width | 105.6 mm
Label Height Max (metric) | 2,000 mm
Interfaces | RS232 C, USB 2.0, Ethernet 10/100 Base T
Supported Barcodes, Printer | Standard, 2D
Printer Memory | 64 MB RAM
Dimensions W x H x D | 248 mm x 395 mm x 554 mm
Weight | 21 kg

Thermal transfer ribbons for heat shrink and Tiptags

**TTDTHOUT – Smudge, Scratch, Oil, Benzene and Alcoholic Solvent Resistant**

The TTDTHOUT ribbon consists of a special resin composition. In combination with our identification materials the printing is high resistant against high temperatures, scratches and chemicals. The thermal transfer print technology is based on heating up certain dots in the print head. This transfers the ink very precisely from the ribbon onto the surface of the printed material.

**Features and benefits**
- Thermal transfer ribbons for high quality print results on heat shrink tubing and Tiptag identification tags
- Ribbons are specifically designed to maximize print performance for the recommended material

**ID:** The standard inside core diameter is 25.4 mm.
Even big things have small beginnings.

You have to work with what you’ve got – and that was exactly what our company founder Paul Hellermann did back in 1935. Inspired by the small rubber tube in bicycle valves, he developed a process for binding electric cables with rubber: the Hellermann grommet and three-pronged pliers. The first two of the hundreds of patents filed since then.
Manual tensioning tool plastic housing
**EVO7 up to 4.8 mm strap width**

HellermannTyton’s EVO7 mechanical hand tool was ergonomically designed to reduce the risks of repetitive stress injuries to operators while concurrently increasing productivity. The EVO7 Tension/Lock/Cut Technology delivers performance, safety and comfort for the operators. Available in a standard grip span (EVO7) or short grip span (EVO7SP), for smaller hands. Additional accessories are available.

**Features and benefits**
- Ergonomic, slip-proof handle for a comfortable and secure grip
- Extremely low-maintenance
- Fast and precise application with minimum effort (TLC mechanism)
- Convenient and simple tension adjustment
- Extended, slim nose for use in narrow spaces
- Housing made of resilient and lightweight glass fibre-reinforced polyester
- Standard grip span (90 mm) and short grip span (80 mm) available

**Manual tensioning tool plastic housing
**EVO9 up to 13.5 mm strap width**

The EVO9 is available in a standard grip span 90 mm (EVO9) or short grip span 80 mm (EVO9SP), for smaller hands. Both tools perform between 53N and 307N. The EVO9HT (high tension) was designed to apply HellermannTyton cable ties from 120N until 516N with a maximum width of 13.5 mm.

**Features and benefits**
- Standard grip span (90 mm) and short grip span (80 mm) available
- Ergonomic, slip-proof handle for a comfortable and secure grip
- Extremely low-maintenance
- Fast and precise application with minimum effort (TLC-technology)
- Convenient and simple tension adjustment
- Integrated 3 position quick adjustment override (EVO9/EVO9SP/EVO9HT)
- Housing made of resilient and lightweight glass fibre-reinforced polyester

Manual tensioning tool for KR-Series

**KR6/8**

Application tool KR6/8 crimps the glass-fibre-reinforced locking pin of the KR seal and leads to plastic deformation of the tie ends. This produces a very proof permanent connection. In combination with KR cable ties this system offers high vibration resistance. One reason for customers in the railway and automotive industry to take this system as a preferred solution.

**Features and benefits**

- Tough metal tool for applying KR cable ties only
- For tensioning, fixing and cutting KR cable ties
- Simply change the front plate to apply 6 mm or 8 mm straps

Gas powered hot air tool

**E4500**

The E4500 hot air gun starter kit is ideal for working in cramped spaces or where there is no power supply. The kit includes a E4500 hot air tool with protective spring, gas cartridge P445, reflector nozzle Z2 and flat nozzle Z3. The hot air tool is suitable for shrinking all types of heat shrink products including tubing, shapes and cable repair sleeves. It can also be used for the bending and shaping of PVC pipes, soft soldering of copper pipes, drying, defrosting (of locks), heating and paint stripping.

**Features and benefits**
- Cordless hot air gun works with special gas cartridge
- Does not need any power supply
- Suitable for outdoor use
- Designed for heat shrink tubing, end caps and moulded shapes
- Supplied with protective spring, two nozzles and a gas cartridge
- Allows precise working in any position even in restricted spaces
- Can be operated on its stand for hands free use
- Light weight tool
- Operating time of cartridge: approx. 1.5 hours
- With easy Piezo ignition

Our product range for railway infrastructure

We offer a wide range of solutions to help you create or maintain the railway infrastructure. We adapt your needs and supply products that conform to your requirements. Whether you need to identify cables in a metro station or under extreme conditions outdoors, we can supply you with the solution that fits. Halogen free, flame retardant, low or high temperature, plastic or metal, we will be more than happy to help you select the right product for your application.

Cable ties with ball-lock
MBT-Series, stainless steel 304

Metal ties are ideal for all applications that require high strength, reliability and fire resistance. The MBT range of stainless steel cable ties can be used in chemical industries and on oil platforms as well as in mass transit, shipbuilding and mining industries. MBT ties are also suitable for machine building, construction and in the outside area of radio technology. Additionally MBT ties are ideal for securing lighting in theatres and exhibition halls.

**Features and benefits**
- Cable ties MBT, made from stainless steel 304
- Non-releasable locking feature
- Corrosion resistant
- Weather resistant
- Outstanding chemical resistance
- High temperature resistant
- Non-burning

Cable ties with ball-lock and coating
MBT-FC-Series, stainless steel 316

The MBT range of stainless steel cable ties can be used in the most arduous of conditions or where the additional security, strength and fire resistance of a metal fixing is required. Used in all industries from mass transit, ship building, oil rigs, mining and chemical industry, theatres and exhibition halls. In the event of a fire, cables will remain securely held in place and will not fall to block emergency exits. Fully coated ties can also be used to avoid any reflection. An important consideration for instance in the defence industry.

Features and benefits
- Fully coated MBT, made from type 316 stainless steel with polyester coating
- Non-releasable locking feature
- Coated cable tie with smooth edges
- Comfortable handling and installation
- Eliminates contact corrosion between dissimilar materials during application

MBT-Series 4.6 mm and 7.9 mm width

Cable Ties and Fixings
Cable Ties, Stainless Steel

Stainless steel cable ties, coated, MBT_SFC, MBT_HFC.

MATERIAL
- Stainless Steel (SS316), Polyester (SP)

Operating Temperature
- -80 °C to +538 °C

Operating Temperature
Coating
- -50 °C to +150 °C

Flammability
- non-burning (except coating)

HF ✓ LFH ✓ RoHS ✓
Protective channel for stainless steel ties

**LFPC-Series**

When used in conjunction with the MBT, MST, MLT and AMT range of stainless steel cable ties this channel gives the cable protection against chafing, vibration and shock. Ideal for use in arduous conditions such as those found on board ships, oil rigs or in nuclear power stations.

**Features and benefits**
- LFPC channel, manufactured from Polyolefin
- Works with MBT-, MST-, MLT- and AMT-Series
- Smooth surface protects bundle against chafing caused by vibrations and shocks
- Can be cut from roll to any length
- Halogenfree
- Flame retardant

---

**MATERIAL**
- Polyolefin (PO)

**Colour**
- Black (BK)

**Operating Temperature**
- -40 °C to +90 °C, (+160 °C, for 200 h)

**Flammability**
- UL 94 V0

**Screw Fixing Mounts**

**Stainless Steel 316 mounts**

Suitable for the secure fixing of cables, tubing, conduits and pipes within the most arduous of environments. Providing a complete fastening and fixing solution when used in conjunction with stainless steel ties up to 10.0 mm width. SSPC metal cable tie mounts are ideal for use within shipbuilding, oil and gas (offshore), industrial machinery and vehicles, food and beverage, power, renewable energy or process industries.

**Features and benefits**

- 2-way fixing for metal cable ties
- High performance stainless steel 316 material
- Heavy duty design
- Robust and durable solution
- Resistant to a range of chemicals in challenging environments
- Quick and easy to install
- Safe and secure solution for cables, tubing, conduits and pipes

---

**SSPC Series (plan view)**

**SSPC-Series (side view)**

**Manual tensioning tool for metal ties MBT-Series**

**MK9SST up to 16.0 mm strap width**

The MK9SST is constructed with heavy duty parts to ensure optimum performance. It is designed to apply our MBT cable ties with a strap width of up to 16 mm. The tool is ideally suited for use in most arduous environments such as found on board ships, oil rigs, constructions or in nuclear power stations.

**Features and benefits**

- Glass-fibre-reinforced housing
- Ergonomic design
- Consistent tensioning and automatically cutting of metal ties MBT-Series
- Infinitely adjustable tension force combined with two-step quick adjustment

Heat shrinkable straight-through joint with mechanical connectors

**LVK-C - adhesive lined**

LVK-C is a heat shrinkable straight-through joint for universal connecting of unarmoured polymeric cables or conductors insulated with PVC, PE and XLPE. With mechanical connectors for aluminium or copper cables. Voltage level 0.6/1.0 (1.2) kV.

**Features and benefits**
- Universally suitable to connect cables and conductors
- Immediately ready for use
- Using a high-quality thermoplastic inner adhesive
- Good corrosion protection properties with excellent abrasion resistance and weather resistance
- TCP (thermo chromatic paint) spots indicate the sleeve has been sufficiently heated
- Resistant to chemical agents and alkaline earths
- Excellent shrink behavior
- High UV resistance
- With mechanical connectors
- Halogen free

**Content of Set / Kit**
Outer sleeve, inner sleeves, mechanical connectors, cleaning cloth, emery cloth, installation instructions

---

**MATERIAL**
- Polyolefin, cross-linked (PO-X)

**Colour**
- Black (BK)

**Shrink Ratio**
- up to 4:1

**Operating Temperature**
- -55 °C to +110 °C

**Min. Shrink Temperature**
- +120 °C

**Softening Point Adhesive**
- +105 °C

**Longitudinal Change**
- After Shrinkage: -10 % max.

**Dielectric Strength**
- 20 kV/mm according to ASTM D 2671

---

Heat shrinkable cable repair sleeves

RMS wrap-around sleeves are closed with a steel channel. The sleeve is adhesive lined and will effectively seal the cable after shrinkage. RMS sleeves provide fast, watertight and reliable insulation.

Features and benefits
- Fast, moisture proof and permanent repair of cable jackets
- Only 6 sizes for a wide range of cable diameters: from 15 mm up to 160 mm
- Available in 4 standard lengths and also in custom lengths on request
- Each RMS kit is ready for use and comes with instruction sheet, abrasive strip and cleaning sachet
- The metal closure is made of 316 stainless steel for high overall corrosion resistance
- Weather resistant and halogen free
- TCP (thermo chromatic paint) spots indicate the sleeve has been sufficiently heated

MATERIAL
- Polyolefin, chemically cross linked (PO-X)
- Shrink Ratio: up to 4.5:1
- Operating Temperature: -40 °C to +120 °C
- Min. Shrink Temperature: +110 °C
- Softening Point Adhesive: +105 °C
- Longitudinal change after shrinkage: -10 % max.
- Dielectric Strength: 30 kV/mm
- Flammability: not flame retardant

Straight-through joint without connectors
RELICON i-Line SF

RELICON straight-through joints are made for installations in low-voltage electrical networks. They are suitable for jointing on polymeric cables and wires made of PVC, XLPE, PE, EPR and utility cables.
Application: Connections in industrial buildings, power supply in the ground, outdoors and in the water.

Features and benefits
• Two-part, impact-proof, transparent moulding shells
• Compact, optimized dimensions
• Standard cable diameters indicated on the shells
• Safe-Filling system (SF)
• Immediately ready for use
• Longitudinally and transversely watertight
• Joint can be cast under influence of water

Content of Set / Kit
• Cast resin PUR 33
• Two-chamber pouch, transparent
• Moulding shells, transparent
• SF-system and nozzle
• Protective gloves, emery cloth, installation instructions
• HelaTape vinyl electrical tape
• Spacer for max. 5 core cable (i-1 to i-4)

Straight-through joint with connectors

RELICON i-Line Premium SF

RELICON Premium straight-through joints are provided with an integrated connector block and made for low-voltage electrical networks. They are suitable for jointing on polymeric cables and wires made of PVC, XLPE, PE, EPR and utility cables.

Application: Underground, submerged, outdoor, indoor and wiring ducts.

Features and Benefits
- Two-part, impact-proof, transparent moulding shells
- Compact, optimized dimensions
- Standard cable diameters indicated on the shells
- Safe-Filling system (SF)
- Immediately ready for use
- Longitudinally and transversely watertight
- Joint can be cast under influence of water
- Connectors for aluminium and copper conductors
- Safe connection for up to 5 core cables

Content of Set / Kit
- Cast resin PUR 33
- Two-chamber pouch, transparent
- Moulding shells, transparent
- SF-system and nozzle
- Protective gloves, emery cloth, installation instructions
- HelaTape vinyl electrical tape
- Connector block with 5 screw connectors incl. allen key

With connector!

MATERIAL  Polyurethane resin 33 (PUR33)
Colour  Green (GN)
Operating Temperature  -25 °C to +120 °C
Storage Temperature  +4 °C to +40 °C
Shelf Life  48 months

Two-component polyurethane cast resin
RELICON PUR 33

The RELICON PUR 33 cast resin has been created for the electrical insulation and mechanical protection of cable connections in low-voltage electrical networks. Also suitable as mechanical and moisture protection on medium-voltage cable connections.

Application: For indoor and outdoor use.

Features and benefits

- In a practical, transparent two-chamber pouch
- Colour changes from blue to green whilst mixing
- Safe-Filling system (SF)
- Excellent flow properties, low volume shrinkage
- Cold curing and very hydrophobic, to cast under the influence of water
- High hydrolytic stability and good curing at low temperatures
- UV, ageing and weather resistant
- Outstanding impact strength and resistance to moisture and atmospheric corrosion
- Excellent adhesion to polymeric cables and wires made of PVC, XLPE, PE, EPR
- SVHC-free, contains no hazardous substances, the cured product can be disposed of with house hold waste
- Halogen free

Two-component polyurethane cast resin PUR 33.
RELICON Religel Clear

RELICON Religel Clear is a transparent, soft elastic two-component silicone gel. It is packed in practical bottles or canisters including measuring cup and mixing stick.

LED potting technology, Encapsulation of printed circuit boards, Installation of electrical connections, Belowground or submerged, Model-making and hobby applications

Features and benefits
- Optimal visual control through transparent material
- Crystal clear gel after curing, excellent insulating properties, suitable for LED applications
- Multiple use possible, mixing ratio 1:1
- Excellent flow and insulating properties
- Excellent moisture and chemical resistance
- Soft elastic, vibration absorbing and removable residue-free

RELICON Religel Plus

RELICON Religel Plus, Fast curing and heat resistant two-component silicone gel

Electrical insulation in low-voltage applications, Encapsulation of cables and wires in junction boxes, Building and household installations, Belowground, submerged

Features and benefits
- Timesaving due to fast curing time
- Stable up to 200 °C
- Visual control of the homogenous mixture indicated by green-coloured component B
- Multiple use possible, mixing ratio 1:1
- Excellent flow and insulating properties
- Excellent moisture and chemical resistance
- Soft elastic, vibration absorbing and removable residue-free

Identification tags for cable bundle, thermal transfer

**TIPTAG – UV-stabilised Tiptags, Polyurethane**

The Tiptag PU cable markers consist of a robust and flexible polyurethane material. It is especially suited for harsh environments where the material is exposed to chemical, fluids or abrasion. Tiptag PUs are presented in a special perforated format which include fastening slots for easy fitting with cable ties. They are also suitable for retrofit purposes. Print from the reel with HellermannTyton’s premium range of thermal transfer printers. A special ribbon has been developed for Tiptag PU to create a “tattoo” effect so that the marking cannot be rubbed off and is particularly durable and resistant to harsh abrasion.

**Features and benefits**
- Durable and robust polyurethane material
- For large cable bundles and wires
- Flame retardant
- Weather resistant
- Abrasion resistant
- Good resistance to chemicals
- Available in white and yellow as standard
- Perforated format with fastening slots for cable ties

**MATERIAL**
- Polyurethane resin DS (PUR DS)

**Operating Temperature**
-65 °C to +120 °C, intermittent +150 °C

**Flammability**
-self-extinguishing, UL 94 V0 (3 mm)

**Recommended Ribbon Type**
-TTRC+

**Thermal Transfer Printer**
-TT430, TT4030

**Identification Systems**
Wire and Cable Markers

---

**TIPTAG PU – printed mark has a tattoo-like permanency.**

Self-laminating labels, thermal transfer
Helatag 1209 (White-Transparent)

These labels are ideal identifying cables and wire. They consist of a printable area plus a lamination function for protection of print text against humidity, dirt, debris and mechanical abrasion. Due to its flexibility these labels are also suitable for flat ribbon cables.

Features and benefits
- High-quality self-laminating labels
- Suitable for marking of wires and cables
- Laminating function gives excellent protection against humidity and mechanical abrasion
- Rounded edge design gives additional bonding strength

Helatag 1209 offers an excellent protection against abrasion and environmental impact.

MATERIAL
Type 1209, Vinyl (PVC), white (WH), transparent (CL)

Operating Temperature
-20 °C to +80 °C

Curing Temperature
from 0 °C

Adhesive
Acrylic

Thickness of Foil
90 µm

Chem. Material Properties
Resistant to water, alcohol, most oils, greases, fuel, aliphatic solvents, weak acids, salts and alkalis.

Recommended Ribbon Type
TT932DOUT

Thermal Transfer Printer
TT430, TT4030

# Self-laminating labels, thermal transfer

**Helatag 323 (White-Transparent), high temperature**

This self-laminating label consists of a printable area plus a lamination function for protection of print text against humidity, dirt, debris and mechanical abrasion. It is ideally suited for wire and cable marking in both high temperature and outside environments, particularly used in industry as well as military technology.

## Features and benefits
- High temperature self-laminating labels with an inscription field
- Extremely scratch and chemical resistant
- Protective laminating foil ensures optimal protection against humidity, dirt, debris, and mechanical abrasion
- Survives 5 years external weathering in central European climate

### MATERIAL

- **Type 323, Polyvinylidene Fluoride (PVDF)**
- **Operating Temperature**: -40 °C to +140 °C, intermittent +160 °C
- **Curing Temperature**: from +10 °C
- **Adhesive**: Acrylic
- **Thickness of Foil**: 25 µm
- **Chem. Material Properties**: Excellent resistance against water, UV radiation, weather influence and solvents based on petroleum.
- **Recommended Ribbon Type**: TT932DOUT
- **Thermal Transfer Printer**: TT430, TT4030

### Identification Systems

- **Wire and Cable Markers**
  - Self-laminating labels, thermal transfer
  - Easy marking of flexible, semi-rigid and rigid cables and wires.

Self-laminating labels, manual marking
RiteOn, Starter Pack, Material 1401 Dispenser

A specially developed material for use in labels required to wrap around cables and wires. The conformable structure of the label ensures that once the label is applied to the wire it remains in place without lifting.
The SPRO200-1401-WH Starter Pack contains all you need to start work identifying your wires:
1 x RiteOn dispenser
1 x RO202 reel of 150 self-laminating labels for cable diameters ranging from 6 mm to 12 mm
1 x T82S-BK black indelible ink marker pen

Features and benefits
• Palm sized hand held self-laminating label dispenser
• Easy to write on and dispense labels
• Wide range of wire diameters covered as standard
• Ideal for low volume maintenance and repair work
• Write text with specially formulated fast-drying ink T82 pens

Self-laminating labels, manual marking
HELASIGN, Material 1402, Booklet

A quick and simple on-site solution, for either permanent or temporary marking of wires, cables and pipes.

Features and benefits
• Self-laminating labels supplied in handy pocket-sized booklets
• Booklet cover protects labels when stored
• Ideal for low volume maintenance and repair work
• Easy to write on and dispense labels
• Laminating function gives excellent protection against humidity and mechanical abrasion
• Applicator tool for clean application enclosed
• Write text with specially formulated fast-drying ink T82 pens

Panel plate labels, thermal transfer
Helatag 1220 (White)

Panel labels are durable adhesive labels especially made from a thick material that is designed to replace traditional engraved plastic plates. The white glossy colour is suited to industrial control panels, switchgear, data racks and general equipment labelling.

Create crisp and clear professional looking labels by printing with HellermannTyton thermal transfer printers and ribbons. Simple label design creation is easily achieved using TagPrint Pro.

Features and benefits
- Cost-effective replacement for engraved plastic plates, no need for additional label holder
- High performance adhesive and compressible foam backing ensures optimal adhesion to uneven surfaces if required
- Rounded corners ensure better long term durability of adhesion
- Print high contrast text and barcodes
- Print ‘On Site’ not order ‘Off Site’
- Special sizes and colours are possible on request
- For outstanding chemical resistance use TT122OUT

MATERIAL
- Type 1220, Polyester (PET), white (WH)
- Operating Temperature: -40 °C to +90 °C
- Curing Temperature: from +4 °C
- Adhesive: Acrylic
- Thickness of Foil: 625 µm

Recommended Ribbon Type
- TT122OUT, TT822OUT

Thermal Transfer Printer
- TT430, TT4030

One Step to the Web!

Panel labels Helatag 1220 – high performance adhesive ensures optimal adhesion to uneven surfaces.

Panel plate labels, thermal transfer
Helatag 1221 (Silver)

Panel labels are durable adhesive labels especially made from a thick material that is designed to replace traditional engraved plastic plates. The silver colour is suited to industrial control panels, switchgear, data racks and general equipment labelling.

Create crisp and clear professional looking labels by printing with HellermannTyton thermal transfer printers and ribbons. Simple label design creation is easily achieved using TagPrint Pro.

Features and benefits
- Cost-effective replacement for engraved plastic plates, no need for additional label holder
- High performance adhesive and compressible foam backing ensures optimal adhesion to uneven surfaces if required
- Rounded corners ensure even long term durability of adhesion
- Print high contrast text and barcodes
- Print ‘On Site’ not order ‘Off Site’
- Special sizes and colours are possible on request
- For outstanding chemical resistance use TT122OUT

Panel labels are an ideal replacement for engraved plates.

### MATERIAL
- Type 1221, Polyester (PET), silver (SR)

### Operating Temperature
- -40 °C to +90 °C

### Curing Temperature
- from +4 °C

### Adhesive
- Acrylic

### Thickness of Foil
- 625 µm

### Chem. Material Properties
- Excellent resistance to ageing, weathering and UV-radiation. Extensive resistance to the influence of chemicals and solvents.

### Recommended Ribbon Type
- TT122OUT, TT822OUT

### Thermal Transfer Printer
- TT430, TT4030

### RoHS

RFID cable ties provide an innovative solution for clear and rapid product identification. The nylon cable ties are equipped with an RFID transponder and therefore combine the numerous advantages of a regular cable tie with RFID technology. The ties are especially suited for securing, serialisation, tracking and identification of products in the areas of resource management, electrical inspection, inventory, distribution and rental services as well as for easy management of maintenance and repair routines.

Features and benefits
- Flexible, contactless data communication
- Clear identification of objects through unique numbering
- Faster data management compared to paper solution
- More accurate documentation processes – prevention of human errors
- Robust and resistant to harsh environments and cleaning processes
- Low frequency (LF – 125 kHz) - Read only
- High frequency (HF – 13.56 MHz) - Rewritable

Stainless steel ties with RFID transponder

**MBTRFID – High Frequency (HF) and Ultra High Frequency (UHF)**

Stainless steel RFID cable ties are fitted with a slide-on carrier for a high frequency (HF) or an ultra-high frequency (UHF) RFID transponder. These ties are ideal for product identification in all areas of harsh environment where high tensile strength and durability is of importance. The ties are especially suited for securing, serialisation, tracking and identification of products in the areas of resource management, electrical inspection, inventory, distribution and rental services as well as for easy management of maintenance and repair routines.

**Features and benefits**

- MBT stainless steel (316) tie complete with RFID transponder
- Especially suited for applications in harsh environments
- Patented non-releasable locking feature
- Flexible, contactless data communication
- Clear identification of objects through unique numbering
- Faster data management compared to paper solution
- More accurate documentation processes – prevention of human errors
- High frequency (HF – 13.56 MHz)
- Ultra high frequency (UHF – 869 MHz)
- Rewritable
- Standard colour red, black coating is also available as a special

**Accessories with RFID transponder**

**HEXTAG – High Frequency (HF)**

The HEXTAG made from PA66 is equipped with a transponder of HF frequency. The central hole allows a simple mounting in applications where a RFID cable tie solution is not suitable. All HellermannTyton RFID products can be used for securing, serialisation, tracking and identification of products in the areas of resource management, electrical inspection, inventory, distribution and rental services as well as for easy management of maintenance and repair routines.

**Features and benefits**
- Can be fitted using a chosen fixing element through the centre hole
- Flexible, contactless data communication
- Clear identification of objects through unique numbering
- Faster data management compared to paper solution
- More accurate documentation processes – prevention of human errors
- Robust and resistant to harsh environments and cleaning processes
- High frequency (HF – 13.56 MHz)
- Rewritable
- Yellow colour for easy visual detection

Accessories with RFID transponder

The CRADLE equipped with a HF transponder can be used with standard HellermannTyton cable ties. All RFID products can be used for securing, serialisation, tracking and identification of products in the areas of resource management, electrical inspection, inventory, distribution and rental services as well as for easy management of maintenance and repair routines.

Features and benefits

- Cable tie slot to suit HellermannTyton’s standard cable ties up to 7.9 mm wide
- Made from durable TPU and is suitable to be used in salt water conditions
- Flexible, contactless data communication
- Clear identification of objects through unique numbering
- Faster data management compared to paper solution
- More accurate documentation processes – prevention of human errors
- Robust and resistant to harsh environments and cleaning processes
- Date on RFID chip can be reprogrammed (HF) – no waste
- Yellow colour for easy visual detection
- Other colours and frequencies are available on request
- High frequency (HF – 13.56 MHz)
- Rewritable

RFID CRADLE – can be used with a standard HellermannTyton cable tie.

RFID Readers

RFID Handheld Reader

The HS9 handheld RFID readers are designed to read LF transponders and read/write to HF transponders fitted to HellermannTyton RFID cable ties and accessories. The readers act as an interface between the RFID transponder and computer systems or databases. Radio waves transmit the data from the RFID transponder to the reader, so that contactless reading and/or writing of information is possible. The HS9 reader is available for low frequency (LF, 125 kHz, read-only) and for high-frequency (HF, 13.56 MHz, read and write) transponders. RFID system solutions can make a significant contribution to improving the process reliability and quality in a variety of industries.

Features and benefits
• RFID handheld reader
• Write capability on request
• Low frequency (LF – 125 kHz)
• High frequency (HF – 13.56 MHz)
• USB, HID interface
• Wireless transmission via Bluetooth
• Operator convenience
• Lightweight and handy design
• Compatible with Android- and iOS-devices
• 9V alkaline battery included

RFID Readers

RFID Desktop Reader

The RFID-DT22 desktop reader for stationary use has been designed to read and write from/to high frequency (HF 13.56 MHz) transponders fitted to HellermannTyton RFID cable ties and accessories. The reader acts as an interface to computer systems and databases. Radio waves transmit the data from the transponder to the reader, so that contactless reading of information is possible. RFID system solutions can make a significant contribution to improving the process reliability and quality in a variety of industries.

Features and benefits
• RFID desktop reader
• High frequency (HF – 13.56 MHz)
• For reading and writing of data
• USB, HID interface
• Operator convenience
• Lightweight and handy design

Stainless steel embossing system

**M-BOSS Compact**

M-BOSS Compact is a quiet easy-to-use metal plate embossing printer with a small production footprint. It is simple to install and operate and only needs a standard electrical supply and a PC. Texts are created with Tagprint Pro 3.0. Simply open the easy to use program to create print lists. Improved cooling system now ensures a continuous operation between 8-10 hours. Marker plates are attached to pipes and cables using 4.6 mm width MBT cable ties and a MK9SST hand tool.

**Features and benefits**

- Small and easy to use metal plate embosser
- Quiet embossing mechanism suited to production and office environments
- Embossed characters have been tested to withstand 1.5 million strikes each
- Improved cooling systems allows 8-10 hours continuous printing
- Use Tagprint Pro 3.0 labelling software with pre-loaded templates to simplify print jobs
- 45 piece character set as standard - can be upgraded to 60 characters
- Numbers: 0 1 2 3 4 5 6 7 8 9
- Symbols: & - / . , ' Ä, Ö, Ü
- Other symbols available on request

Stainless steel embossing system

**M-BOSS Compact including Organiser**

The M-BOSS Compact with included Organiser system gives the added advantage of a self-contained storage system within the print unit. The organiser is a 10 container carousel storage system that can be programmed to hold either an individual or a pre-defined set of marker plates. This means that users have the flexibility to manage how they work with the printed output. A simple input screen on the top of the machine is used to specify the quantity per container within the carousel. The carousel drawer when opened extends 430 mm from the front of the printer.

**Features and benefits**

- Ability to manage how the printed marker plates are organised
- Carousel system under the printer has 10 removable marker plate containers
- Flexible output means all marker plates or a set amount can be sent to each container
- Carousel system will hold up to 400 markers
- Each container can hold 40 marker plates

Stainless steel printing system
M-BOSS Compact Markers

M-BOSS Compact Markers are used in all areas where severe mechanical or chemical conditions occur e.g. offshore industry, marine engineering, petrochemical industry, mining, underground or on radio and cellular masts where mark permanence is critical.

The raised surface of the embossed print ensures that the text remains visible even with dirt, grease, and paint cover the marker. The physical characteristics of the metal and the height of the embossed mark allows users to apply a stiff or metallic brush to the surface and remove excess layers of paint or grease without damaging the integrity of the text.

Features and benefits
- Raised marking ensure text visibility even when covered in dust, debris, grease and oil
- Stainless steel grade SS316 is suited for use in harsh environments
- Marker plates are designed for use with stainless steel cable ties with a 4.6 mm strap width
- Apply ties with a MK9SST

Labelling software

**TagPrint Pro 3.0**

TagPrint Pro 3.0 is the easy-to-use label/marker design and printing software in the HellermannTyton printing. Compatible with Windows® 7, Vista and XP as well as future operating systems such as Windows® 8, TagPrint Pro 3.0 delivers an individualised, task-based experience that enables a user to easily develop print templates including bar codes, text and graphics to meet numerous applications. TagPrint Pro 3.0 streamlines labeling production by offering a user full control over the importing or entering of data, advanced security features, the option to group label designs under a single file name or job number, and the ability to batch print to either one or more printers at the same time.

**Features and benefits**

- Easy and intuitive label/marker template design
- WYSIWYG
- Print to multiple printers at one time
- Save jobs in a queue and print all at one time with „Print later“ function
- Connect or import directly from other databases including Excel, Access, text files
- Text, graphics and barcode functionalities
- Full text editing functions
- Inverse, flip, and mirror image options for graphic images
- Print log available

**System Requirements**

- **TagPrint Pro Standalone/TagPrint Pro Client**
  - PC running Microsoft Windows XP SP3, Vista SP1 or later, Windows 7, 8, 10
  - .NET Framework 4
  - 512 MB RAM (XP SP3)
  - 1.0 GB RAM (Vista/Windows 7, 8, 10)
  - 500 MB available hard disk space.

**Thermal transfer printer**

**TT430, Small to medium volume printing**

The TT430 thermal transfer printer is perfect for printing on HellermannTyton materials such as self-adhesive labels, shrinkable tubing and identification tags. Thanks to its low weight and compact construction, the TT430 integrates seamlessly into any workstation. It is easy to use due to its intuitive touch display and clear status messages which can be shown in multiple languages. The optional cutter and perforator make this printer ideal for a wide range of applications. 300 dpi resolution ensures that barcodes, warning symbols, logos and text are as sharp as they can be.

**Features and benefits**

- Medium volume single sided printing
- Print on HellermannTyton cable markers and labels
- Uses standard ribbons
- Barcodes: standard and 2D
- Print speed up to 125 mm/s (30mm/s recommended for Ladder Style products and tubing)
- Adjustable label sensor
- Multiple language selection
- Windows drivers: 32/64 bit for Windows XP, Windows Vista, Windows 7, 8, 10

**Thermal transfer printer**

**TT4030, High volume printing**

HellermannTyton’s premium printer TT4030 is specifically designed for medium and heavy duty industrial applications. The 300 dpi print head fulfils all standard requirements for printing bar codes, warning signs, logos and written information. Optional premium quality accessories such as a perforator and cutter are designed to work seamlessly with the printer and will suit the most demanding needs.

Printing high definition graphics such as 2D barcodes, standard bar codes, numbers and text on adhesive labels, thermo plastics such as heat shrink and cable markers (Tiptags) is easily done.

A colour LCD Touchscreen with modern user interface helps intuitive operation.

Creation of professional looking industrial identification is simplified by the use of HellermannTyton’s label creation software TagPrint Pro 3.0.

Whether in stand-alone mode, as a PC application or in a network - the robust TT4030 printers can meet every requirement.

**Features and benefits**

- High volume single sided printing
- Print on HellermannTyton heatshrink tubing, cable markers and labels
- Uses standard 300 m ribbons
- Barcodes: standard and 2D
- Print speed up to 300 mm/s (30 mm/s recommended for ladder style products and tubing)
- Multiple language selection
- Windows drivers: 32 / 64 bit for Windows XP, Windows Vista, Windows 7, 8, 10

**Thermal transfer ribbons for Adhesive Labels**

The thermal transfer print technology is based on heating up certain dots in the print head. This transfers the ink very precisely from the ribbon onto the surface of the printed material. All HellermannTyton ribbons consist of a special resin composition to maximise print performance. In combination with HellermannTyton printers the ribbons ensure the highest of print quality on all HellermannTyton thermal printable identification materials.

**Features and benefits**
- Thermal transfer ribbons for highest quality and performance of printed labels
- Ribbons are specifically designed to maximise print performance for the recommended material

**Thermal transfer ribbons for heat shrink**

**TTRC+** Smudge, Scratch, Oil, Benzene and Alcoholic Solvent Resistant

TTRC+ is a unique printer ribbon which has been specially formulated to penetrate the surface of printable substrates, including heat shrink marker sleeves and tie on marker tags. With the application of heat or after the duration of seven days, TTRC+ will produce a “tattoo” effect, making an excellent permanent mark.

**Features and benefits**

- Thermal transfer ribbons for high quality print results on heat shrink tubing and Tiptag identification tags
- Ribbons are specifically designed to maximize print performance for the recommended material

**ID:** The standard inside core diameter is 25.4 mm.
