

Conflict Minerals Informations:

Dear Conflict Minerals Team,

Aptiv's interim 2019 conflict minerals reporting template (CMRT), dated August 29, 2019 is attached. Aptiv's company level CMRT, covers all Aptiv sites. If you prefer to receive data through iPoint, please send a request to iPoint id 2693.

We will continue to evaluate, follow-up and compile our supplier responses throughout the remainder of this reporting year. An updated 2019 CMRT will be sent to you by end of November 2019 and Aptiv's final year-end CMRT will be sent by end of January 2020. At which time, you will see an increased supplier response rate, additional information and Aptiv's final smelter list.

Aptiv does not track material usage in a manner that allows us to respond at an individual product level for any of its products, customers, or sites. Aptiv's "company level" response is applicable to all products sold by Aptiv, including Antaya and HellermannTyton.

Aptiv seeks to ensure compliance with all U.S. sanctions. We communicated to our relevant supply base that we will not accept product that contains raw materials sourced from these smelters. Aptiv appreciates your understanding and patience as we work with the 3 suppliers currently listing JSC Ekaterinburg smelters to confirm removal from the supply chain.
